

## TRAINEE OFFSHORE TECHNICIAN

**Location:** Livingston

**Accountable to:** Operations Manager

**Salary:** On application

FoundOcean is the subsea and offshore grouting specialist for the global energy construction industries. Its primary business is securing structures to the seabed by foundation grouting. FoundOcean provides structural repair services for subsea and offshore structures, as well as pipeline and cable support and protection services.

Visit our website for more information at FoundOcean – Subsea and offshore grouting for the global energy construction industries.

This job is an offshore working role with travel away from home required but also involves onshore workshop work.

### Primary Responsibilities

- Assist in the setting up and safe running of grouting equipment
- Perform sampling and testing of grout mixes.
- Ensure safe operating practices are adhered to
- Clean and maintain equipment and work area
- Communicate with other crew members
- Aiding crew in mobilisation and set-up of all plant and equipment
- Work under the Supervision of FoundOcean Supervisor Grouting

### Maintaining Company and Operational Standards – Health and Safety

- Know, understand and ensure compliance with the safety regulations (Occupational Health and Safety Regulations and Code) and safety policies and procedures
- Ensure quality assurance through safety procedures
- Follow project specific procedures for the work to be carried out and as amended

### Skills, Knowledge and Experience

- Possesses a relevant qualification or has experience of working with plant and equipment used in construction activities
- Knowledge of Health and safety requirements and standards
- Previous experience working within an offshore organisation
- Possesses locally recognised offshore safety certification including but not restricted to:
  - BOSIET and MIST
  - MEDICAL
  - Working at Height
  - Confined Space
  - First Aid
  - Security Awareness
  - Seaman's Discharge Book

## Key Attributes

- Strong team player with the ability to work autonomously
- Organised, logical and methodical approach to work
- Willingness to learn new practices and technical techniques
- Practical problem solver
- Ability to work under pressure to tight deadlines
- Dependable and Trustworthy
- Maintain a positive and enthusiastic attitude
- Excellent communication skills
- Flexible to change and work in extreme and difficult environments
- You will be expected to become respectful to other cultures and tolerant of international communication barriers

For the right applicant, there is an attractive remuneration package on offer including 33 days holiday and a 10% employer contribution to pension scheme.

**FoundOcean is an equal opportunities employer.**
