

Associate Mechanical Design Engineer

Are you a graduate interested in working for the world's largest dedicated offshore construction grouting company? Are you passionate about developing your skills and growing your career?

Join our team in FoundOcean where we will offer you the opportunity to unlock your full potential in a dynamic and rewarding work environment within our team. We are looking for a graduate to join in the role of Associate Mechanical Design Engineer to start on the next step of our exciting journey and provide project bias to ensure the effectiveness of ongoing Operations within the organisation.

At FoundOcean, our vision is to use our heritage and expertise to support the energy transition. Throughout the last 6 decades we have evolved into the world's largest dedicated offshore construction grouting company. We remain the energy industry's first choice in the facilitation of new and innovative materials and equipment to the market.

Opportunity and Job Scope

As our Associate Mechanical Design Engineer, you will support with the design, procurement, fabrication, assembly and testing of new equipment. You will also support the design requirements for offshore operations and assist with document control of drawings, fabrication packages and ensuring timely submission of these to the projects team. You will be key in building further our communications and report writing within our team.

More information about the full job role please contact hr@foundocean.com.

Who Are You

We are looking for a recent Mechanical Design Engineer Graduate or a Mechanical Design Engineer with 1-2 years' experience with an interest in offshore design and/or heavy plant equipment. Full training will be provided for this role as it is a junior position with an expanding company.

As a new member of the FoundOcean family, you will be encouraged to use your initiative, experience, and talent to help us grow. Based in Livingston, this role will provide you with an amazing opportunity and include travel to other sites.

Qualifications

- Relevant Engineering qualification from degree level in Mechanical or Mechanical Design Engineering and above (other qualifications will be considered, depending on experience).
- Knowledge and ability to operate and complete 2D modelling and 3D modelling with a view to produce fabrications drawings.
- Knowledge of metal fabrication processes, dimensioning and tolerances is desirable.

The right to work in the UK.

We Can Offer

At FoundOcean we offer you the fantastic opportunity to gain valuable experience, together with competitive terms, benefits, and a satisfying and motivating workplace with a focus on ongoing learning and development.

Associate Mechanical Design Engineer

For the right applicant, there is an attractive remuneration package on offer with a competitive salary, 33 days holiday and 10% employer contribution to pension scheme.

If you have any questions or would like to discuss this role further, please reach out to us or apply with CV including your salary expectations by email to hr@foundocean.com.

FoundOcean is an equal opportunities employer.
